I am unable to sponsor, but would like to support the project with a donation of \$ _____

Please provide your logo and/or ad in PDF and/or JPEG format for our promotions. Please make checks payable to: **Rocky Point Lions Club, PO Box 323, Rocky Point, NY 11778** • Phone: (516) 818-4775 • Email: rtshesco@aol.com

Total enclosed \$ _____

Our Honoree:

Tesla Science Center at Wardenclyffe

In 1996, a board of teachers at Shoreham-Wading River High School were looking for a new place to house the school's science museum. Their search led to a surprising find: the last existing laboratory of one of history's greatest scientists happened to be sitting vacant in the neighborhood.

The laboratory was called Wardenclyffe, and it was built in 1901 by Nikola Tesla, whose inventions include A/C electricity, WiFi, fluorescent lighting, radio, X-ray technology, and much more. Wardenclyffe once housed Tesla's famous 187-foot wireless transmission tower. Conceived almost a century before the invention of the internet, Tesla's tower was an ambitious and unprecedented project, designed to send both communication signals and free power around the world—without wires.

Although the tower was dismantled in 1917, it was a feat of engineering that remains to this day the tallest above-ground structure ever erected on Long Island.

When the board members discovered the 16-acre site, it was overgrown, deteriorating, and likely headed for demolition. They formed a non-profit organization with a mission to preserve Tesla's only remaining laboratory and develop it into a science and education center that will continue his legacy of technological innovation and humanitarianism. A massively successful crowdfunding campaign enabled the group—now called Tesla Science Center at Wardenclyffe (TSCW)—to buy Wardenclyffe in May 2013, a momentous achievement for a group of local advocates. Since then, TSCW has been pursuing an aggressive restoration and development plan. Volunteers, donors and influencers from Long Island and around the world have been critical to TSCW's mission. Permits, site plans, historic research and preservation work will require extensive ongoing effort and funding to bring the dream of a science center and Tesla museum to life.

The Rocky Point Lions Club

Chartered in 1955, The Rocky Point Lions Club serves the communities of Mt. Sinai, Miller Place, Sound Beach, Rocky Point, Shoreham and Wading River. Over the years, the Club has raised money and used it to support various individuals in need and organizations that support our communities. This has included scholarships each year to graduating students from Mt. Sinai, Miller Place, Rocky Point and Shoreham-Wading River High Schools. In addition to helping families in need in our communities, the Club has supported InvitedINN, St. Anthony of Padua Outreach Program, Rocky Point Booster Club, Lions Club International, American Cancer Society, Middle Island and Rocky Point Rotary Clubs, local Scout Troops, Mercy Haven, Cleary Foundation for the Deaf, VISIONS for the Blind, Heritage Trust Fund, Lion's Camp Badger, The Guide Dog Foundation, Trinity Church Food Pantry and many other worthy causes. The money received from this event will directly support this year's honoree and will help the Club continue in our efforts to achieve our motto...**WE SERVE.**
