NEW YORK INSTITUTE OF TECHNOLOGY

College of Arts & Sciences

Are you interested in becoming a grades 7-12 STEM teacher?

Robert Noyce Teacher Scholarship

The National Science Foundation Robert Noyce Teacher Scholarship Program provides scholarships, stipends, and programmatic support to recruit and prepare talented STEM graduates and professionals from all economic circumstances to serve as STEM teachers in high-need school districts. New York Institute of Technology has received a grant of $1.2 million covering scholarships for 16 scholars over the next five years.

About Our Program

Science and mathematics professionals and majors who have completed a B.A. or B.S. in a STEM discipline are eligible to apply for a full-tuition Robert Noyce Teacher Scholarship as they work towards an M.A.T. degree. While completing their coursework, our Noyce Scholars will undergo additional training in cultural competency, hands-on activities for STEM learning, and teaching with technology.

After earning initial New York State teaching certification in biology, chemistry, math, or physics, we will help our Noyce Scholars find placement in schools where they will continue to receive mentoring. Scholarship recipients must agree to teach for at least two years in high-need school districts.

The university has existing partnerships at Valley Stream Central, Roosevelt, Westbury, and Academy Charter high schools. Students may also arrange teaching placements in other area schools.
