

# METAL TESLA

## BUSINESS COLLECTION PARTNERS

Help prevent metal waste in our landfills while supporting the restoration of Wardencllyffe. If you are a local Long Island business that regularly handles scrap metal, we invite you to become a business collection partner.

### HOW TO GET STARTED:

**1 Start Collecting Metal** - Set aside your metals which could include vehicle parts, car batteries, appliances, electronics (except TVs and computer monitors), metal furniture, shelving, pipes, hardware, and tools. All metals including iron, copper, brass, stainless steel, cast iron, and aluminum are acceptable.

**2 Monitor Your Collection** - Keep an eye on your growing pile of metal. Once it reaches approximately the size of a small truck load, you're ready for the next step. This size guideline ensures efficiency in collection and transportation.

**3 Communicate** - Contact the TSCW office at (631) 886 - 2632 and let them know you have metal ready for pickup. Please include your name, business, business address and telephone number. A member of our volunteer team will contact you to arrange a convenient pickup time. Our team is volunteer based, which means we strive to be as responsive and accommodating as possible. Thank you for your participation!

**Ideal Partners:** While we welcome contributions from all types of businesses, those within the automotive industry or have heavy amounts of waste metal often have the types and quantities of metal that align with our recycling efforts. From old car parts to unused metal equipment, your industry's contribution can significantly impact our cause.

**Volunteer Limitations:** Please note that our collection service is entirely volunteer-based. Therefore, there may be limitations on the range we can cover for pickups and the time frames within which we can operate. We appreciate your understanding and flexibility as we work together to make a significant impact.

**Why Participate?:** By joining this initiative, your business not only aids in the environmental effort to recycle and reuse but also contributes to preserving the legacy of Nikola Tesla. Each donation supports the transformation of Wardencllyffe into a global science center, celebrating Tesla's contributions and inspiring future generations.
